[Vers 1]

Through the darkest nights
The fire is burning bright
Keep it up so glide
Following the light

Through the cold and the
storm
We will get through it all

On we go, on we go
Searching for an answer
On we go, on and on
Now there's not an after
Off we go, off we go
Hearts are beating faster
For What We Love

So I let the flame show
See the riches fill with
colour
Can you hear the wind blow
Wind blow and it gets
harder

[Vers 2]

If you walk alone
Even if you're lost
In the great unknown
Just move at any cost

On we go, on we go
Searching for an answer
On we go, on and on
Now there's not an after
Off we go, off we go
Hearts are beating faster
For What We Love

So I let the flame show
See the riches fill with colour
Can you hear the wind blow
Wind blow and it gets harder

[Vers 3]

All we have to overcome
My story gives us power
We make sacrifices boldly
Make the flame grow high

So we let the flame show
See the riches fill with colour
Can you hear the wind blow
Wind blow and it gets harder

Have we let the flame show
See the riches fill with colour
Can you hear the wind blow
Wind blow and it gets harder
